PROFESSIONAL SUMMARY

Security+ certified IT and cybersecurity professional with hands-on experience supporting Windows and Linux systems, network connectivity, endpoint security, troubleshooting, PowerShell automation, and security operations. Experienced installing and maintaining network and IP camera infrastructure, resolving connectivity and device-access issues, and supporting technical systems in operational environments and an Azure-hosted enterprise cyber range.

CYBERSECURITY EXPERIENCE

Cybersecurity Support Analyst Intern | Log(N) Pacific

Jan 2026 - Present

Vulnerability Management & Security Operations - Azure-Hosted Enterprise Cyber Range with Live External Attack Activity

- Configured Azure NSGs and virtual-machine host firewalls to restrict inbound exposure; observed brute-force activity dropped to zero during the measured period after the controls were implemented.
- Performed secure-configuration and DISA STIG reviews with Tenable/Nessus and developed PowerShell remediation and hardening workflows to reduce manual effort and accelerate finding closure.
- Supported vulnerability scanning, risk prioritization, remediation, and validation across Windows and Linux systems, contributing to reductions from 2 to 0 critical findings, 12 to 1 high findings, and 17 to 2 medium findings in the measured server environment.
- Investigated EDR/SIEM telemetry with Microsoft Defender for Endpoint, Microsoft Sentinel, KQL, and Azure Log Analytics for brute-force activity, data exfiltration, and ransomware indicators; built custom detection rules and dashboards to improve investigative visibility.

SELECTED CYBERSECURITY PROJECTS

- **Vulnerability Management & DISA STIG - Lab project:** Reduced Tenable findings from 32 to 4 through authenticated scanning, prioritized remediation, and follow-up validation; scripted and validated selected Windows 11 DISA STIG controls with PowerShell.
- **WannaCry Ransomware Investigation - Live Threat Cyber Range Investigation:** Investigated a threat-actor ransomware compromise of an exposed Azure VM after insufficient NSG and host-firewall controls allowed brute-force access; used KQL to correlate endpoint telemetry, confirm file-encryption impact, and assess lateral movement.
- **Password Spray Threat Hunt - Live Threat Cyber Range Investigation:** Used Microsoft Defender for Endpoint and KQL to reconstruct an RDP compromise, map evidence to MITRE ATT&CK, and identify detection opportunities.
- **Akira Ransomware Threat Hunt - Simulated Cyber Range Exercise:** Analyzed endpoint telemetry with KQL to scope affected hosts and reconstruct remote access, lateral movement, defense evasion, staging, and impact.

ADDITIONAL EXPERIENCE

Warehouse & Facilities Manager | UTB Ventures | Los Angeles, CA

Mar 2015 - Jan 2026

- Installed, maintained, and troubleshot the facility network and IP security-camera system, including connectivity and device-access issues.
- Managed daily facility operations, vendors, access, inventory, maintenance, scheduling, and client requirements.

Field Artillery Fire Control Man, Fire Direction Control | United States Marine Corps

Sep 2009 - Dec 2012

- Led teams of 3 to 8 Marines as an NCO while operating, maintaining, and troubleshooting mission-critical communications and targeting systems under time-sensitive conditions.

EDUCATION & CERTIFICATIONS

Norwich University: B.S. Cybersecurity, Computer Forensics & Vulnerability Management | Mar 2025

GPA: 3.99 | Summa Cum Laude

Cypress College: A.S. Business Administration | May 2021 | Graduated with Honors

Certifications: CompTIA Security+ | May 2026 • Google AI Professional | Jul 2026

TECHNICAL SKILLS

IT Support & Systems: Windows, Linux, Active Directory, PowerShell, Bash, Python, SQL, Network Connectivity, Device-Access Troubleshooting

Networking & Security: Azure NSGs, Firewalls, pfSense, Wireshark, VLANs, SSH, RDP, IP Security Cameras

Vulnerability Management & Hardening: Tenable/Nessus, Authenticated Scanning, CVE/CWE Review, CVSS Scoring, Risk Prioritization, Remediation Tracking, DISA STIG, Windows/Linux Hardening

Security Operations & Detection: Microsoft Defender for Endpoint, Microsoft Sentinel, KQL, SIEM/EDR Analysis, Threat Hunting, Incident Triage, MITRE ATT&CK Mapping, Detection Rules, Azure Log Analytics
