Professional Summary

Security+ certified junior cybersecurity analyst supporting vulnerability management and security operations across Windows and Linux environments. Experienced with Tenable, PowerShell, Microsoft Defender for Endpoint, Microsoft Sentinel, KQL, and DISA STIG guidance for risk prioritization, remediation automation, system hardening, and security investigations. U.S. Marine and summa cum laude cybersecurity graduate, 3.99 GPA.

Professional Experience

Cybersecurity Support Analyst Intern

Jan 2026 – Present

Vulnerability Management & Security Operations | Log(N) Pacific

- Supported vulnerability scanning, reporting, risk prioritization, and remediation across Windows and Linux systems; the server team's measured results included a 100% reduction in critical findings (2 to 0), 92% reduction in high findings (12 to 1), and 88% reduction in medium findings (17 to 2).
- Performed secure-configuration reviews and DISA STIG activities using Tenable/Nessus; developed PowerShell remediation and hardening workflows to reduce manual work and accelerate finding closure.
- Conducted EDR/SIEM threat hunting with Microsoft Defender for Endpoint, Microsoft Sentinel, KQL, and Azure Log Analytics for brute-force activity, data exfiltration, and ransomware indicators; created detection rules and dashboards to improve investigative visibility.
- Configured Azure NSG and virtual-machine host firewall controls to restrict inbound exposure, contributing to a 100% reduction in observed brute-force incidents during the measured period.

Warehouse & Facilities Manager

Mar 2015 – Jan 2026

UTB Ventures

Los Angeles, CA

- Managed daily operations for a mixed-use warehouse and studio-rental facility, coordinating scheduling, access, inventory, vendors, maintenance, and client needs.
- Installed and maintained the facility network and IP security-camera system, troubleshooting connectivity and device access; also performed facility build-outs involving room construction, electrical work, and plumbing.

Field Artillery Fire Control Man, Fire Direction Control

Sep 2009 – Dec 2012

United States Marine Corps

Jacksonville, NC

- Served as an NCO responsible for supervising and developing junior Marines, directly leading teams of 3–8 through duty assignments, training, accountability, and operational standards.
- Operated and maintained mission-critical communications and targeting systems; executed standardized verification procedures to protect data accuracy and reduce risk during time-sensitive operations.

Selected Cybersecurity Projects

- Password Spray Threat Hunt:** Used Microsoft Defender for Endpoint Advanced Hunting and KQL in a Microsoft Sentinel workflow to trace RDP compromise, execution, persistence, evasion, C2, and attempted exfiltration; mapped evidence to MITRE ATT&CK and documented detection opportunities.
- Akira Ransomware Threat Hunt:** Used MDE telemetry and KQL to scope hosts and reconstruct remote access, staging, lateral movement, defense evasion, data staging, and impact; documented IOC timing, ATT&CK mappings, evidence gaps, and detection opportunities.
- Vulnerability Management & DISA STIG:** Reduced Tenable findings from 32 to 4 through authenticated scanning and remediation; scripted and validated selected Windows 11 STIG controls with PowerShell.

Education & Certifications

Norwich University: Bachelor of Science in Cybersecurity, Computer Forensics & Vulnerability Management, Mar 2023 – Mar 2025; GPA: 3.99, Summa Cum Laude

Cypress College: Associate of Science in Business Administration, May 2018 – May 2021; GPA: 3.70, Graduated with Honors

Certifications: CompTIA Security+ | CompTIA | May 2026; Google AI Professional | Google | Jul 2026

Technical Skills

Vulnerability & Hardening: Tenable/Nessus, Vulnerability Scanning, CVE/CWE Review, CVSS Scoring, Risk Prioritization, Remediation Tracking, DISA STIG, Windows/Linux Security Configuration

Security Operations: Microsoft Defender for Endpoint, Microsoft Sentinel, KQL, SIEM/EDR Analysis, Threat Hunting, MITRE ATT&CK Mapping, Detection Rules, Azure Log Analytics, Incident Triage

Automation & Systems: PowerShell, Bash, Python, SQL, Active Directory, Windows, Linux

Network & Cloud Security: Azure NSGs, Firewalls, pfSense, Wireshark, VLANs, SSH, RDP

Professional Skills: Leadership, Communication, Strategic Planning, Public Speaking, Problem Solving
